

SCAFFOLD INDUSTRY ASSOCIATION

TRAINING PROGRAM

WHAT WE OFFER

Scaffold User Safety and Hazard Awareness

For employees that perform work while on a scaffold. The program covers scaffold safety with regard to falls, falling objects, electrocution, unsafe access and collapse. Emphasis is on hazard identification and accident prevention.

Scaffold Primary Access Safety Training

Designed for entry level scaffold erectors and covers erection procedures for scaffold that does not exceed the height to base ratio including rolling scaffolds and all the safety aspects included in the Scaffold User Safety and Hazard Awareness course. The course is available in all three major supported scaffold systems: Frame Scaffolds, System Scaffolds and Tube and Coupler Scaffolds.

Scaffold Competent Person Safety Training (CPT)

Available in all three major supported scaffold systems: Frame Scaffolds, System Scaffolds and Tube and Coupler Scaffolds. This program is for scaffold erectors and covers all the safety aspects regarding Scaffold Foundations, Scaffold components, Regulations, Guardrail requirements, and erection and dismantling procedures for scaffolds that exceed the height to base ratio and need to be stabilized.

Professional Scaffold Erector Safety Training Challenge Exam

This comprehensive challenge exam is for Professional Scaffold Erectors with more than 3200 hours of documented work experience. Challengers must successfully pass (70%) a 120 question core examination including mathematics, blueprint reading, scaffold loads, and a 30 question examination specific to the scaffold system (Frame Scaffold, Tube and Coupler Scaffold or System Scaffold.)

Suspended Scaffold Hazard Awareness and Operator Safety Training

Designed for employees that perform work while on a suspended scaffold. This course covers the suspended system, the supported system and emphasizes the safety system for those workers operating a suspended scaffold. The course includes Hands-on training including: basic fall arrest, safe operation of a suspended scaffold, and an introduction to suspended scaffold support systems.

Suspended Scaffold Training

Explains how to set up, operate, and inspect suspended work platforms. The person completing this course will know the basics required to use suspended equipment safely.
